

ROBERT BASHIR MUKANDA

AI & Back-end Engineer — Python · Go · LLM Systems

Nairobi, Kenya · +254 791 496 526 · Robertbashir76@gmail.com · github.com/shutter-bashir · linkedin.com/in/robert-mukanda-22baro · Portfolio: [add your live link]

PROFILE

Final-year Computer Science student with a Diploma in Information Technology (JKUAT) and CCNA certification, building AI and back-end systems that real people use: a six-agent internship outreach system on local LLMs, and an offline-first ledger that a Kenyan savings cooperative uses to manage member funds. Seeking a software or AI/ML internship, with a keen interest in product design.

SELECTED PROJECTS

AI-Powered Internship Outreach System (BASHIR-2.0) | Python, Ollama, Google APIs, SQLite

Solo developer · [GitHub](#)

- Built a six-agent pipeline (Scout, Hunter, Composer, Mailer, Tracker, Follow-up) that finds IT companies across 7 Nairobi zones, extracts contact emails, writes personal applications and tracks every reply.
- Generates emails with a local Ollama model, so CVs and personal data never leave the student’s machine.
- Safe by default: Gmail drafts for review before sending, 30–90 s send throttling, daily limits, and duplicate and bounce detection.

Simba Women SACCO — Offline-First Ledger (PWA) | Vanilla JavaScript, Service Workers

Solo developer · [GitHub](#)

- Digitised the paper ledger of a 32-member Kenyan savings cooperative, now in use.
- Encoded the group’s financial rules: 20% per-cycle interest with flat arrears carry-forward, automatic default flagging after two missed cycles, and two-tier year-end dividends.
- Built for low-end Android: one HTML file under 100 KB with no dependencies, installable and fully offline through a network-first service worker.

Wallet App (Balances) | Next.js, React, Redis

Developer · 2026 · [GitHub](#)

- Built a password-protected, installable wallet for tracking balances across bank cards and savings, with an iOS-style interface and amounts stored in cents to avoid rounding errors.

Urban Suits — Online Store UX/UI | three.js, GSAP

Interface designer · 2026

- Designed a 3D storefront where the catalogue wraps around the visitor as a sphere of cards, with a flat-grid view, a mobile layout and a reduced-motion mode.

LEADERSHIP

- Facilitator, Innovation Docket — UNESCO Club JKUAT:** facilitate student activities, events and advocacy initiatives.
- Millennium Fellow — Millennium Fellowship,** Class of 2026.
- Project Lead, SOUTH Civic Platform** (in development): leading a two-person team building a web portal that connects Nairobi youth with county government programmes.

TECHNICAL SKILLS

- Strongest:** Go, Python, LLM agent systems, RAG, vector search (Qdrant), RESTful API design
- Also:** JavaScript / TypeScript, Next.js, React, Node.js, Progressive Web Apps, SQL (SQLite, MySQL), Redis, Supabase
- Tools:** Linux, Bash, Git, Docker, Google Cloud, n8n, Ollama, Claude Code

EDUCATION

B.Sc. Computer Science — JKUAT	Sep 2024 – Jul 2027 (expected)
Diploma in Information Technology — JKUAT	Sep 2022 – Jul 2024 (completed)

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) — Cisco, 2025
- AI Fluency: Frameworks & Foundations — Anthropic Academy, 2026
- Knowledge Management for Young Professionals — United Nations University, 2026
